SOUMYAJEET MAHANTA

Bhubaneswar, Odisha | +91-7847017388 | soumyajeetmahanta2@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science undergraduate and Full Stack Developer with hands-on experience in Java, Python, JavaScript, React.js, Node.js, REST APIs, and SQL/NoSQL databases. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, and Computer Networks. Experienced in developing database-driven applications, CRUD functionality, frontend-backend integration, authentication-enabled applications, and machine learning solutions. Seeking an entry-level software/full-stack engineering opportunity to contribute to end-to-end feature development in an agile, technology-driven environment.

EDUCATION

B.Tech in Computer Science & Engineering | Gandhi Engineering College, BPUT | Expected 2027
CGPA: 8.60/10

TECHNICAL SKILLS

Programming	Java, Python, JavaScript
Web Development	HTML5, CSS3, React.js
Backend	Node.js, Express.js, REST APIs
Databases	MySQL, MongoDB, SQLite
Core CS	Data Structures & Algorithms, OOP, Operating Systems, Computer Networks
Tools	Git, GitHub, Linux, Docker, VS Code

EXPERIENCE

Web Development Intern | InternPe | May 2026 – July 2026

- Contributed to backend development activities and dashboard functionality for a web platform.
- Worked on interactive user interface components to improve usability and user engagement.
- Gained practical exposure to web application development, software development workflows, and professional team collaboration.

PROJECTS

Full-Stack Web Application | MongoDB, Express.js, React.js, Node.js

- Developed an authentication-enabled full-stack web application using the MERN technology stack.
- Built REST APIs for communication between frontend and backend components.
- Integrated React.js with backend services and MongoDB for application data management.

Inventory Management System | Python, SQLite, PHP, MySQL

- Developed a database-driven application to manage asset availability and issue/return workflows.
- Implemented CRUD operations for creating, retrieving, updating, and deleting inventory records.
- Structured database storage using SQLite/MySQL concepts for organized asset and transaction management.

Facial Expression Recognition Model | Python, TensorFlow, Keras, OpenCV, CNN, NumPy

- Developed a CNN-based model to classify facial expressions from images.
- Used TensorFlow and Keras for model development and NumPy for numerical data processing.
- Implemented real-time facial emotion detection using OpenCV for happy, sad, angry, and neutral expressions.

CERTIFICATIONS & ACHIEVEMENTS

- Python Programming Certification.
- NPTEL Certification in Internet of Things.
- Participant, Smart India Hackathon (SIH).
